By a Confunction and Relation

NUMBER OF MASTERS.

NONDON FRENTAD FOR THE SOCIETY OF MISSER CARPENTERS,

and materials, here a very diproportionate price

to what they do at prefent. Upon this account if

often theopens that the longlover is difficished

PREFACE.

other hard, the reputable Tradelinan is as much

burt, and greatly diffeouraged, when he field than

a hving thereby, or possibly excouse his building

in a good and stork was blike man

Building meets with fo much difficulty in afcertaining the just value of his work, as the Carpenter and Joiner; which is occasioned not only by the vast number and great variety of articles with which it abounds, but for want of precedent in many instances, and on account of bad precedents in many others; to which both Gentlemen and Surveyors may be led to refer (having been established by custom); though the example which directs them may have originated from inexperience and want of skill in the business; or have been intro-

duced and agreed to at a time when mens labour,

and

and materials, bore a very disproportionate price to what they do at present. Upon this account it often happens that the Employer is distaissied and offended, when he supposes that too much is charged for some Articles in his Bill; and, on the other hand, the reputable Tradesman is as much hurt, and greatly discouraged, when he sinds such inadequate prices are allowed, that he cannot get a living thereby, or possibly execute his business in a good and workman-like manner.

In order to remove these difficulties, and every just cause for complaint, and that gentlemen who are the Employers may have their business done in a proper manner, and be satisfied with the Charge; that Tradesmen may be encouraged and enabled to perform their Work in a proper manner, by being allowed a moderate and fair profit on it; the following articles of business, in measured work, are proposed and agreed to, as a proper Standard, or Rule, by which the Prices of Work in general may be regulated: at the same time due observance has been had not to allow in any

one Article more than a reasonable profit; thereby totally to discountenance exorbitant Charges.

intruded topon their lines or that the leaft tefferther,

It is imagined that no candid person will deny; but that men who have ferved an apprenticeship to the Trade, and have had many years experience as Masters, in the various practical parts of it, are the most proper persons to judge of the real value, and affix a price to the work they are employed to execute: and therefore, at a large and very respectable meeting of the principal Master Carpenters in and about London, a felett number of men were defired to form themselves into a Committee, and to enquire, deliberate, and ascertain the real value of Carpenter's and Joiner's Work, when executed in a good and workman-like manner; and to report their proceedings and conclusions at a full meeting, that the same might receive general approbation, before a final determination should take place: the result of which is, that the Body at Large, entirely approving of what they have done, think it their duty to publish the same, for the benefit of the Trade in general.

And it is to be hoped, that no respectable gentlemen in the Surveying branch, will think it an intrusion upon their line; or that the least reslection, or disrespect, is meant to them: but as it is evident a regulation is essentially necessary, so it is humbly conceived to be most natural that it should issue from those persons who more immediately laboured under the inconvenience.—Nor are they without hopes that their well-meant endeavours will meet with the approbation of, not only their Employers in general, but of those Gentlemen in particular, under whose direction they have the honour to be employed.

LONDON, }
April, 1778.

JAMES WOOD, President.
